A much anticipated follow up to his debut album "Ventana", Ken Karsh holds nothing back with a powerhouse jazz guitar performance on his new album "Conversations". A mix of mostly original compositions, Karsh surprises with some unexpected covers that sets the tone for a wide range of emotions to please the most discerning jazz listener. A visit to his musical past and present Ken speaks volumes with his Bebop quintet cut "Polkaboppin" to his heart felt solo musings of "Scarborough Fair". "Conversations" is a must for any jazz collection.
